

You can update your password recovery information using this link

<https://mysignins.microsoft.com/security-info>

- You will be required to log in using your SCC Hub credentials and password if you are not already logged in.
- From this screen, you can use the Change or Delete button to modify or remove sign-in methods
- You can use the **+Add method** button to add a new sign in method
- You will be prompted to verify items that you are adding during this process so they will need to be available at the time of your update

The screenshot shows the Microsoft Security Info page. The browser address bar displays <https://mysignins.microsoft.com/security-info>. The page title is "Security info" and the subtitle is "These are the methods you use to sign into your account or reset your password." The default sign-in method is "Microsoft Authenticator - notification". A table lists the sign-in methods with their respective "Change" and "Delete" buttons. A red box highlights the "+ Add method" button, and another red box highlights the "Change" and "Delete" buttons for the phone, office phone, and email methods. A red arrow points down to the "Change" and "Delete" buttons for the Microsoft Authenticator method.

Method	Details	Change	Delete
Phone	+1 402 [REDACTED]	Change	Delete
Office phone	+1 402 [REDACTED]	Change	Delete
Microsoft Authenticator	SM-N950U		Delete
Email	[REDACTED]@hotmail.com	Change	Delete
